NOTES

ABOUT THIS PUBLICATION

The Monthly Summary of Statistics, Australia contains, at the time of printing, the latest available data on a wide range of topics. It provides a comprehensive overview of the economic and social conditions in Australia.

In the contents pages, tables of series containing seasonally adjusted indicators are marked with a dagger (\dagger) .

As well as being adjusted for normal seasonal factors, some of the statistical series included in the *Montbly Summary of Statistics, Australia* have been adjusted for the effects of calendar variation: namely, 'trading-day' effects (arising from the varying numbers of Sundays, Mondays, Tuesdays, etc. in a month) and the influence of movable holidays, for example, Easter and Australia Day.

Trend estimates are shown for some series in which the seasonally adjusted series have been smoothed to reduce the impact of the irregular component.

SYMBOLS AND OTHER USAGES

The following is an explanation of the symbols used in this publication:

n.a.	not available
n.e.c.	not elsewhere classified
n.e.s.	not elsewhere stated
n.y.a.	not yet available
	not applicable
n.p.	not available for publication unless otherwise
	indicated but included in totals where applicable
р	preliminary — figure or series may be subject to revision
r	figures or series revised since previous issue
	nil or rounded to zero
	break in continuity of series (where drawn across a
	column between two consecutive figures)
*	subject to sampling variability too high for most
	practical purposes.

Yearly periods shown as, for example, 1994, refer to the year ended 31 December 1994, those shown as, for example, 1993–94, refer to the year ended 30 June 1994.

Values are shown in Australian dollars (\$).

Where figures have been rounded, discrepancies may occur between sums of the component items and totals. Also, minor revisions to figures already published are not applied for periods more than one quarter prior to the quarter of publication. Hence, small discrepancies may occur between annual data and totals derived by summing the data for each of the four quarters.

Most of the original and all of the seasonally adjusted series are subject to revision.

FOR MORE INFORMATION

The ABS has a far wider range of information on Australia than that contained in this publication. Information is available in the form of regular publications, electronic data services, special tables and from investigations of published and unpublished data.

Current publications produced by the ABS are listed in the Catalogue of Publications and Products, Australia (1101.0). The ABS also issues, on

Tuesdays and Fridays, a *Release Advice* (1105.0) which lists products to be released in the next few days. The Catalogue and Release Advice are available from any ABS office.

For further information about ABS statistics and services please contact any of the ABS offices (see the back of this publication).

The estimates relate to all persons aged 15 and over except members of the permanent defence forces, certain diplomatic personnel of overseas governments, overseas residents in Australia and members of non-Australian defence forces in Australia. For definitions see Explanatory Notes in the latest issue of the monthly publication *Labour Force*, *Australia* (6203.0). Original labour force estimates are now based on population estimates obtained from the 1991 Census of Population and Housing. The number of unemployed in each group as a percentage of the civilian population aged 15 and over in the same group.

Prior to September 1991 disputes affecting more than one industry and/or State have been counted as separate disputes in each industry and State and in the Australian total. From that time such disputes, while still counted separately in each industry and/or State, are counted just once at the broader industry and Australia level.

Disputes which occurred during the period encompasses those disputes which started in a previous month or year and ended in the reference period or began and ended in the reference period or began and ended in the reference period or began in the reference period and continued into the next period or started prior to the reference month or year, continued through the reference period and into the next period.

3 Comprises workers involved in disputes which commenced during the month and additional workers involved in disputes which continued from the previous month.

See Explanatory Notes in the latest issue of Consumer Price Index (6401.0).

The statistics for Germany refer to Western Germany (Federal Republic of Germany before the unification of Germany).

From March quarter 1994 the statistics for New Zealand refer to 'all groups excluding housing and credit services'.

These indexes replace previous indexes with a base year 1968-69 = 100.0, Refer to May 1990 issue of ABS publication *Price Indexes of Articles Produced by Manufacturing Industry* (6412.0).

These indexes are on a net subdivision basis. ASIC subdivision codes are shown in brackets at the head of the columns.

This index is on a net division basis and relates in concept only to articles which are produced in the Manufacturing Division of ASIC (Division C) for sale or transfer outside the Division.

Source: Australian Bureau of Agnoultural and Resource Economics.
Based on chemical assay.
Primary origin only.
Includes lead content of lead from primary source.
From primary and secondary sources.
Stabilised (includes condensate).

Commercial sales plus field and plant usage.
From July 1992 figures are shown on a calendar month basis.

includes natural gas.

Total electricity generated by establishments predominantly engaged in the generation of electricity.

This senes replaces the previously published Iron and Steel in Primary Forms and Blooms and Slabs from rolling and forging. Changes in industry practices mean that almost all raw steel is now used to produce Blooms and Slabs using continuous casting methods.

For structural purposes.

Source: Australian Bureau of Agricultural And Resource Economics. Quarterly figures are expressed in terms of green off sawn volumes.

Amounts of taxable wool received by brokers and dealers from wool producers.

Includes scoured and carbonised wool used in further processing (for example, for production of tops). Also includes degreased, whether or not bleached or dyed in the mass.

Includes mixtures predominantly of the fibres named. Excludes sewing thread, elastic or elastomeric.

Excludes scoured wool used for carbonising in the same establishment.

Australian Standard Commodity Classification (ASCC) item codes 651.35,36.

ASCC item codes 651.01 – 651.14.

Excludes guaze and elastic fabrics.

⁸ Excludes elastic fabrics and tyre cord.
9 ASCC item codes 652.16,17,70,80.
10 ASCC item codes 654.23,24,25,26,36,37,38,39.
11 ASCC item codes 653.21,22,35,36,37,38,39,40,50,71,72,73,74,75,76,92.

All figures are \$A values at end of period shown. Changes in the \$A value of holdings of oficial reserve assets in any period reflect both valuation effects and transactions. The latter include sales and purchases (including swaps) of, and earnings on, foreign exchange by the Reserve Bank of Australia and certain transactions with official institutions overseas. The foreign currency value of overseas assets is based, where applicable, on market quotations; accrued interest is normally taken into account. Conversion into \$A equivalent is based on end-month rates of exchange.

Reserve Assets and Exchange Rates in the Balance of Gold is valued at the \$A equivalent of the 3 p.m. price fix in the London gold market on the last business day of the month. See also table on Official Payments section, page 54.

The figures in this table are derived from returns submitted by banks authorised under the Banking Act 1959 together with similar returns voluntarily submitted by the State banks; they exclude the Reserve Bank.

All certificates of deposits issued by banks have been shown as resident deposits.
Includes issues of term subordinated debt, loan capital and smilar instruments.

Excludes shareholders' funds.

Break in series due to establishment of new bank(s), which may have caused the switching of assets and liabilities from NBFs to banks.

			·							

¹ Includes government-owned vehicles except those belonging to the defence services. Excludes plant and equipment caravans and trailers. Data from December 1990 in this table is based on the System of Vehicle Identification Numbers (VIN) introduced by motor vehicles authorities from July 1990 onwards. The system allows more accurate identification and classification of newly registered vehicles and as a result there is a reduction in the level of new vehicle registrations through better identification of duplicate registrations and those registered previously.
